EXECUTIVE SUMMARY

This resolution authorizes the Rock County Land Conservation Committee to submit an application to the Wisconsin Department of Agriculture Trade and Consumer Protection for the sponsorship of the Clean Sweep Program in 2019. The Land Conservation Committee sponsored the last Clean Sweep Program in 2018.

The Clean Sweep Program provides landowners, small businesses, and units of government an opportunity to dispose of chemicals in a safe manner. Chemicals banned from disposal in the landfill system will be collected through this program. Also, this program allows businesses that are considered Very Small Quantity Generators to pay for the services and dispose of chemicals used in their businesses. All units of government, from schools to cities, will have this option made available to them.

The applications for the 2019 program year will be released in early fall 2018. The actual dates for release and return have not been set by DATCP as of the writing of this resolution.

This program has a grant limit equal to 75% of the costs of the proposed project. The County may match the 25% requirement with cash and/or services provided by staff for the activities associated with this event. Rock County will develop a grant application for the maximum grant allowed. A majority of these expenses will be incurred through in-kind services provided by the Land Conservation Department.
