

Never Use Alone

24/7/365 US National Overdose Response Line

Using alone dramatically increases the odds of an accidental overdose resulting in death. We know that people can't always have others with them while they use, so that's where we come in!

Anyone in the US can call us, 24/7/365, and one of our operators will stay on the phone with you, and call for help in the event of an emergency.

All operators are harm reductionists, with lived experience in substance use disorders. We've all been there. No one will ever judge you, shame you, or preach at you about quitting. We just want to help increase your odds of survival.

No Shaming
No Judgement
No Preaching
Just Love!
