Work shall proceed according to a schedule mutually agreeable to the Vendor and the Director of Public Works or his designated representative.

3. Payments to Vendor

Payments shall be made either in full or with liquidated damages assessed as specified in Section 460.2.8.2.1.7 of the WisDOT Standard Specifications, with the second sentence of paragraph (8) of Section 460.2.8.2.1.7 being modified to read as follows: Vendor payments shall be deducted for the costs for Owner to remove and replace unacceptable material.

B. SPECIAL PROVISIONS - HOT MIX ASPHALT PAVEMENT MATERIALS

1. General

The work shall consist of producing and supplying Hot Mix Asphalt Pavement Materials in the quantities required in the contract. All materials shall be in accordance with the following order: These attached Special Provisions and the Wisconsin Department of Transportation Standard Specifications for Highway and Structure Construction, latest edition.

Each bidder must have established his qualifications for work of this type with the Department of Transportation, as outlined in Subsection 102.1 "Prequalifying Bidders" of the WisDOT Standard Specifications.

2. Product Source

The bidder shall **submit with the bid** a statement indicating the source of all bituminous material and/or virgin aggregate to be used and certifying that they meet these specifications. The source of supply of all materials shall be subject to the approval of the Director of Public Works. Such approval may be rescinded at any time should the source of supply fail to produce materials of satisfactory quality or quantity.

Approved documentation furnished to the Wisconsin Department of Transportation (WisDOT) about materials, sources, test data and mix design for a particular pit or plant shall be acceptable to Rock County to meet these requirements. Said WisDOT certification shall not apply if material produced herein is no longer using ingredients or methods approved by WisDOT in its approval.

3. Materials

Materials shall comply with these Special Provisions and the applicable provisions of the Wisconsin Department of Transportation "Standard Specifications for Highway and Structure Construction", latest edition.

4. Contract Award

Rock County reserves the right to enter into a contract with one or more bidders for the supply of this material. One bidder may be selected for certain projects, another bidder(s) for others, based on which is more advantageous to Rock County as more completely calculated below.

The determination of the bid that is most advantageous to the Owner shall be computed on a project-by project basis. While a bidder may have the lowest bid price for furnishing the material specified, other factors such as production time (tons/hour) and hauling distance, shall be applied to determine the lowest price for all or selected projects.

In determining the lowest bid for a specific project, the CONTRACT UNIT PRICE PER TON + hauling cost, measured from the anticipated bidder's plant to the center of the project, using the most direct haul road, using Class A, State and County Routes, shall be applied. (See below for example calculation)

<i>Plant Location # 1</i>	
Project Quantity (Tons)	50,000
Haul Distance - One Way (Miles)	15.0
Average Payload per Truck (Tons)	20
Total Loads for project	2,500
Load Times (minutes)	15
Avg. Travel Speed Full (miles/hour)	45
Dump Time (minutes)	15
Avg. Travel Speed Empty (miles/hour)	45
Cycle Time (Minutes)	70.00
Work Efficiency	90%
Total Haul Time (Hours)	3,241
Estimated Cost (\$/hour)	\$ 100.00
Total Hauling Cost	\$ 324,074.07
Asphalt Unit Price (\$/ton)	\$ 45.00
Total Asphalt Cost	\$ 2,250,000.00
Total Cost	\$2,574,074.07

For determination of bid most advantageous to the County, it shall be assumed that Owner shall meet the minimum production of 1,000 tons/day, and the discounted price per ton shall be used. The lowest price for furnishing materials for a specific project shall be computed by adding material and transportation costs together.

Owner also reserves the right to adjust the quantities of material ordered based on Vendor's ability to furnish their materials in an acceptable timeframe. Multiple Bidders may be selected, depending on the project specifics.

Samples and Testing

The Vendor bears the responsibility for providing a Hot Mix Asphalt Pavement Material mixture that meets the job mix formula and these specifications:

On days where the County notifies the Vendor that it intends to use at/or above the 1,000 tons of production that day, the Vendor shall take split samples and test same in conformance with Section 460.2.8.2 of the Specifications for a Quality Management Program (QMP). Vendor shall make available to the Owner, the daily results of said testing as it relates to conformance with the Specifications under this Contract. Vendor shall also provide prepared samples for Owner.

On days where consumption of materials may not meet or exceed 1,000 tons per day but is greater than 200 tons, samples for testing shall be provided to the Owner by the Vendor. The sampling of the Hot Mix Asphalt Pavement Materials shall be witnessed by the Director of Public Works or his designated representative. These samples shall be taken by a certified person at random, at the plant site or at the job site, in boxes provided by the Vendor. A sample shall be provided to the Rock County Director of Public Works or his designated representative. The purpose of the sample shall be the verification of the specifications of the materials provided. A sample shall consist of two boxes of material. Each sample box shall be marked with the following: Type of Mix; Time and Date of Sample; Load Ticket Number.

The Owner, at its cost, may have the split sample(s) tested for conformance with these specifications. Failure to meet the specifications may result in the rejection of the material or an adjustment in the payment for defective materials, as provided in Section 460.2.8.2.1.7 of the Specifications.

The job mix formulas shall meet the general requirements for the mix types shown in the Bid Specifications.

Cost to sample, test, track and report results of the Quality Management Program at the Vendor's facility, shall be included in the unit price bid per Ton of the Hot Mix Asphalt Pavement Material. Other testing or Quality Assurance testing done by the Owner, shall be paid for by the Owner. Vendor stockpiles, tanks and all production facilities shall be open to sampling, inspection and observation by the owner and/or representatives of the Wisconsin Department of Transportation when the County is accepting pavement materials.

5. Data/Records

Certified mix designs shall be provided to the Director of Public Works or his designated representative prior to April 1, 2024. Copies of all test data from production testing to date shall be provided to the Director of Public Works or his designated representative as requested intermittently during the contract, with any remaining test data being provided no later than December 15, 2024.
