MEDIA RELEASE

Slow-No-Wake Lifted on Portion of Rock River

For Immediate Release

Date: August 7, 2024

Contact Person

Deputy Trevor Lund
 608-373-3816

According to US Geological Survey Gauges, the water level for the Rock River at Lake Koshkonong dropped to 7.99 feet. County Ordinance requires a slow-no-wake speed restriction be placed on the Rock River in Newville when the water level exceeds 8 feet; therefore, the Rock River from the south end of Lake Koshkonong, south to the Indianford Dam is no longer under a slow-no-wake speed restriction.

According to US Geological Survey Gauges, the water level for the Rock River in Afton is 7.67 feet. County Ordinance requires a slow-no-wake speed restriction be placed on the Rock River in Afton when the water level exceeds 6.5 feet; therefore, the Rock River from the Indianford Dam south to the W B R Townline Road Bridge is still under a slow-no-wake speed restriction.

Also, County Ordinance requires a slow-no-wake speed restriction be placed on the Rock River in Beloit when the water level exceeds 8.5 feet based on the US Geological Survey Gauges in Afton; therefore, the river from W B R Townline Road Bridge to the Stateline is no longer under a slow-no-wake speed restriction.

Slow-no-wake is defined as operating a vessel at a speed as slowly as possible while still maintaining steering control.
